DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to an apparatus, a method, and a computer readable medium, classified in class 717, subclass 110.

II. Claims 6-8, drawn to a method, an apparatus, and a computer readable medium, classified in class 717, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the invention I has a separate utility as claiming displaying of a plurality of dialog boxes to allow a user to enter information and create graphic objects, and the invention II has a separate utility for claiming writing code, where the code is used for defining and controlling components of a user interface.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

During a telephone conversation with Mr. Fish Ronald, Attorney of record, Reg. No. 28843 on 4/15/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
